

## S T R E T C H I N G    M O D U L A R I T Y

It is a progressive planning from the urban scale site responsive, that merges with the urban fabric of the neighborhood, while having a distinct character integrating sustainable systems that harvest renewable energies; the sun and prevailing winds... Several indoor and outdoor experiences on different levels interfere with the passage through the project, ranging from the most interactive public space to the most private bed room.

The lack of green spaces and public libraries in the neighborhood led to the creation of a space where one can read and enjoy nature, a park and public library. The modular having always a unique dimension, expands along different functions; concrete prefab units are stacked together, providing sleeping spaces, services for the common use, and common areas. Each dorm is set in a different depth and alternating rhythm expressing the individuals unique identity through its form. Thus, the project is a combination of different spaces that allow for a comfortable living, flexible spaces

The configuration of the program allows for comfortable living and a social mix, without interfering with the dormants' privacy.
